Coding:

Items 1 -6 comprise the Appreciation for Complexity subscale
Items 7 – 9 comprise the Intolerance for Ambiguity subscale
Items 10-13 comprise the Propensity to Contextualize subscale

Note for Qualtrics users: Items are presented in a random order on the QSF file.

Scoring: Participants' responses should be averaged across each subscale to form an "Appreciation for Complexity", "Intolerance for Ambiguity", and "Propensity to Contextualize" score.

Prompt:

You will now be given a set of statements about how you think about visual art objects. By “art objects” we mean paintings, photographs, illustrations/drawings, and murals that are created from an artist. Using a scale from 1 (strongly disagree) to 6 (strongly agree), please answer how well each item describes you.
