UNUSUAL AESTHETIC EXPERIENCES SCALE

This scale is intended to measure aesthetic experiences that fall broadly into the category of profound, awe-like experiences.

There are usually three factors:

- The first, a *chills* factor, is made up of "feel chills down your spine," "feel like your hair is standing on end," and "get goose bumps."
- The second, a *touched* factor, is made up of "feel touched" and "feel like crying."
- The third, an *absorption* factor, was made up of "feel absorbed and immersed," "completely lose track of time," "feel like you're somewhere else," "feel detached from your surroundings," and "feel a sense of awe and wonder."

Nevertheless, additional structural studies with large and diverse samples or with other modeling approaches (e.g., network psychometrics, bifactor models, etc.) would be worthwhile.

For administration, there are a few options. For general work, you can ask participants to list the domain of the arts they encounter most often (usually music followed by film), and they can then complete the items with reference to that domain.

A more common and focused use would be to ask participants to fill out the scale with reference to a specific domain, such as music. The sample version of the scale shown below follows this method.

The scale was first reported here:

> Silvia, P. J., & Nusbaum, E. C. (2011). On personality and piloerection: Individual differences in aesthetic chills and other unusual aesthetic experiences. *Psychology of Aesthetics, Creativity, and the Arts*, *5,* 208-214.

For other readings for the scale's background and use, see:

> Nusbaum, E. C., & Silvia, P. J. (2014). Unusual aesthetic states. In P. P. L. Tinio & J. K. Smith (Eds.), *The Cambridge handbook of the psychology of aesthetics and the arts* (pp. 519-539). Cambridge, UK: Cambridge University Press.

Music Experiences Scale

This questionnaire asks about some feelings, sensations, and experiences people may have while listening to music. Please complete the following survey, which asks how often you have these different feelings or sensations while listening to music.

Please use the following scale:

1	2	3	4	5	6	7
Never or Rarely			*Sometimes*			*Nearly Always*

While listening to music, how often do you...

_____ feel absorbed and immersed

_____ feel moved

_____ completely lose track of time

_____ feel chills down your spine

_____ get goose bumps

_____ feel like you're somewhere else

_____ feel like your hair is standing on end

_____ feel like crying

_____ feel touched

_____ feel detached from your surroundings

_____ feel a sense of awe and wonder

_____ feel a lump in your throat
