RIBS: Runco Ideational Behavior Scale

Citation:

> Runco, M. A., Plucker, J. A., & Lim, W. (2001). Development and psychometric integrity of a measure of ideational behavior. *Creativity Research Journal*, *13*(3-4), 393-400.

The 23-item RIBS uses a 5-point scale (1 = *never*, 5 = *very often*). The original article does not provide the instructions given to the participants.

Note that Runco and his colleagues later presented a shorter, 19-item version of the RIBS with a modified response scale and detailed instructions:

> Runco, M. A., Walczyk, J. J., Acar, S., Cowger, E. L., Simundson, M., & Tripp, S. (2014). The incremental validity of a short form of the ideational behavior scale and usefulness of distractor, contraindicative, and lie scales. *The Journal of Creative Behavior*, *48*(3), 185-197.

First Factor

1. I have many wild ideas.

2. I think about ideas more often than most people.

3. I often get excited by my own new ideas.

4. I come up with a lot of ideas or solutions to problems.

5. I come up with an idea or solution other people have never thought of.

6. I like to play around with ideas for the fun of it.

7. It is important to be able to think of bizarre and wild possibilities.

8. I would rate myself highly in being able to come up with ideas.

9. I have always been an active thinker—I have lots of ideas.

10. I enjoy having leeway in the things I do and room to make up my own mind.

12. I would take a college course which was based on original ideas.

13. I am able to think about things intensely for many hours.

19. I try to exercise my mind by thinking things through.

20. I am able to think up answers to problems that haven't already been figured out.

21. I am good at combining ideas in ways that others have not tried.

22. Friends ask me to help them think of ideas and solutions.

23. I have ideas about new inventions or about how to improve things.

Second Factor

11. My ideas are often considered "impractical" or even "wild."

14. Sometimes I get so interested in a new idea that I forget about other things that I should be doing.

15. I often have trouble sleeping at night, because so many ideas keep popping into my head.

16. When writing papers or talking to people, I often have trouble staying with one topic because I think of so many things to write or say.

17. I often find that one of my ideas has led me to other ideas that have led me to other ideas, and I end up with an idea and do not know where it came from.

18. Some people might think me scatterbrained or absentminded because I think about a variety of things at once.
